

# PANELS & VENEER

CONTEMPORARY/ENGINEERED

## BAMBOO PANELS & VENEER

Crafted to deliver a luxurious, contemporary look that exudes sustainability and natural authenticity, our engineered Bamboo panels and veneer are an eco-friendly alternative to traditional timber products.

Our engineered laminated bamboo panels come in either a horizontal or vertical pattern and can be matched to any length or thickness to create modern, sophisticated cabinetry and joinery items including cladding, furniture, stairs and benchtops.

Visually appealing and hand-crafted, our Bamboo Woven Veneer is weaved in narrow strips and has two standard styles; Basket Weave and Herringbone. Offering a wide range of sizes it is suited to an array of projects including flooring, cabinetry and joinery and being resistant to moisture makes it an ideal choice for kitchens and bathrooms.

## BAMBOO VENEER

## A BAMBOO LEGACY

At House of Bamboo®, we are carrying on a legacy that was founded last century, when Mark Snyders first began to source environmentally conscious bamboo. Recognised globally as a leading bamboo specialist, we are committed to creating beautiful, environmentally friendly bamboo products and encouraging Australians to embrace the benefits of bamboo.

## A SUSTAINABLE FUTURE

In addition to being House of Bamboo® CEO, Jennifer Snyders also pursues her passion for sustainability by advocating bamboo projects throughout Australia and supporting land regeneration and reforestation.

Having qualified at UNSW with a Bachelor of Science (Architecture), she understands the incredible potential of bamboo and her sense of design and technical understanding has allowed her to develop a range of engineered bamboo products that can out perform timber.
