1980's The range expanded to include natural wallpapers, rattans, and handmade items.

1990's Bamboo screening was introduced. Bambuzit and Natureed.

2000 Jennifer Snyders joined House of Bamboo and saw the rise of DIY TV shows and brand exposure for HOB

2002 Designed screening using acacia timber that was harvested from FSC forests in Vietnam

2002-2007 House of Bamboo became a regular feature on national television shows Burke's Backyard and Backyard Blitz

2011

Jennifer Snyders took over House of Bamboo and spent a few years learning all things about bamboo from ecology to production.

2015

Relaunched House of Bamboo with a focus on sustainable materials for the Australian market and delivering a circular economy.

2016

The engineered bamboo collection was introduced.

2019

Developed first series of engineered bamboo materials using bio-glue

2020

Awarded Global GreenTag Level A and Global GreenTag Platinum Health Ratings for HOB engineered bamboo battens and cladding.

Developed the first bamboo CPD for industry leaders in architecture as a means to educate about bamboo's potential for the built environment

2023

Became CEO of Bamboo Plantations Aust.  
Became President Bamboo Society Australia  
Joint winner MECLA Sustainability Award  
Designed and manufactured curved beams for Marvel Stadium

2024

Launch new HOB Showroom constructed from engineered bamboo including structural beams, joinery etc.

## SEACHANGE SERIES®

Elegantly designed yet cleverly practical, our engineered laminated bamboo holds a Global GreenTag Level A rating, guaranteeing sustainable manufacturing practices. The SeaChange Series® helps deliver innovative and imaginative projects with elegant battens and pre-made screen solutions that are perfect for shading, privacy screening, fencing and cladding.

As a superior alternative to timber, these panels are engineered from laminated bamboo strips, creating slats that are lighter, stronger and more sustainable than traditional timber.

Fixed to anodised aluminium battens, creating modules that are ready for installation, the SeaChange Series® features a number of different styles delivering unlimited flexibility to transform your indoor and outdoor spaces.

## SYMPHONY SERIES®

Elegant and eco-friendly, our fine-quality engineered bamboo offers an innovative and broad scope to deliver an array of creative solutions for your projects.

Our Symphony Series® provides a range of cladding and acoustic options perfect for feature walls, ceilings, shading and soffits and is available in various designs, lengths and widths.

Creating a premium level of sophistication the Symphony Series® is popular with both indoor and outdoor applications due to their lightweight, versatility and seamless installation. The series comes in three styles with their own unique attributes:

- Cello Series - Ribbed/Slatted Look Cladding
- Concerto Series - Scalloped/Flat Cladding
- Opera Series - Acoustic Panels

Our engineered bamboo holds Global GreenTag Level A and Platinum Health Ratings, guaranteeing sustainable manufacturing practices and non-toxicity.

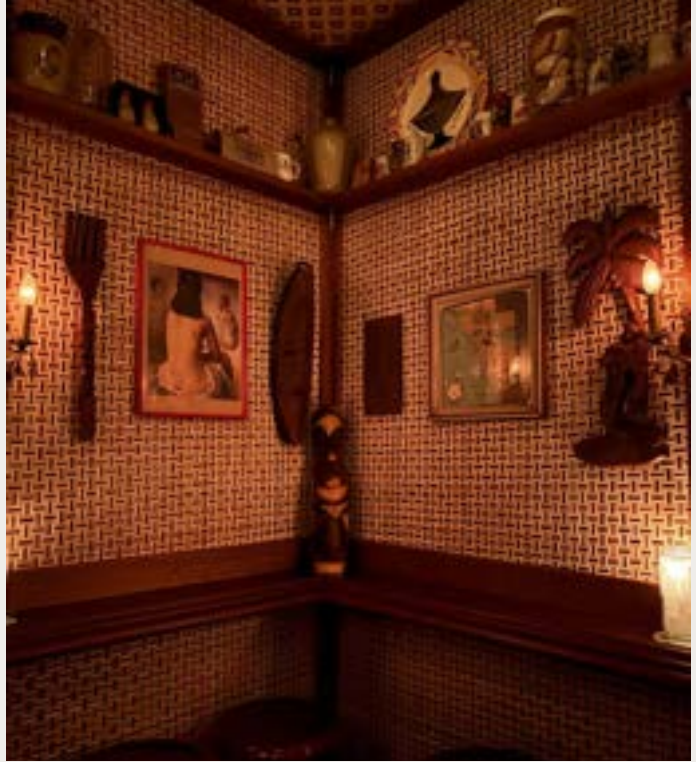

## RATTAN CANE WEBBING

A hardy and versatile material, our handwoven artisanal rattan cane webbing is an increasingly sought-after feature. As a sophisticated and relaxed natural fibre, it creates a contrasting background colour or backlighting for a soft warm glow.

Woven in community villages, our rattan is premium grade and of the highest quality. Our relationship with the community from which it is sourced, dates back more than 40 years, as we continue to support this tradition.

House of Bamboo exclusively offers bespoke bamboo frames with rattan inserts and stocks Australia's largest range of open and closed weaves, with over 20 designs and shades available.

## WOVEN PANELS

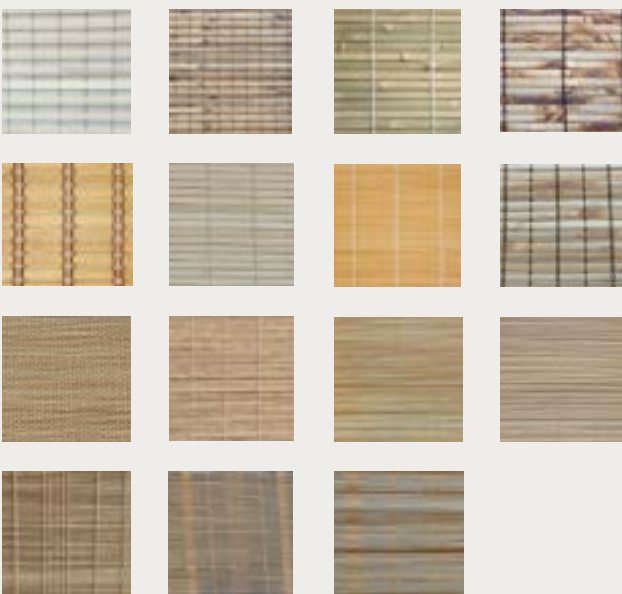

Intricately handmade, our bamboo panels are woven into distinctly unique patterns including horizontal, vertical and traditional herringbone.

Increasingly specified by leading architects and designers wishing to create an Asian/Polynesian look, woven bamboo panels are enjoying a renaissance in luxury spaces producing statement pieces that bring a sense of elegance and sophistication.

Our naturally woven bamboo panels are produced only from certified sustainable sources of bamboo and we provide the largest variety of styles and colours in Australia. With a 20-year-plus lifespan and a Global Greentag Platinum Health and Level C Rating these bamboo panels bring a sense of natural style wherever they are used.

## BOHEMIAN SHEER BLIND RANGE

Introducing our new Bohemian Sheer Blind range, where subtlety, delicacy, and elegance converge to create a refined aesthetic. Crafted from the finest quality bamboo, these blinds offer a natural matchstick style that brings a touch of organic beauty to any interior.

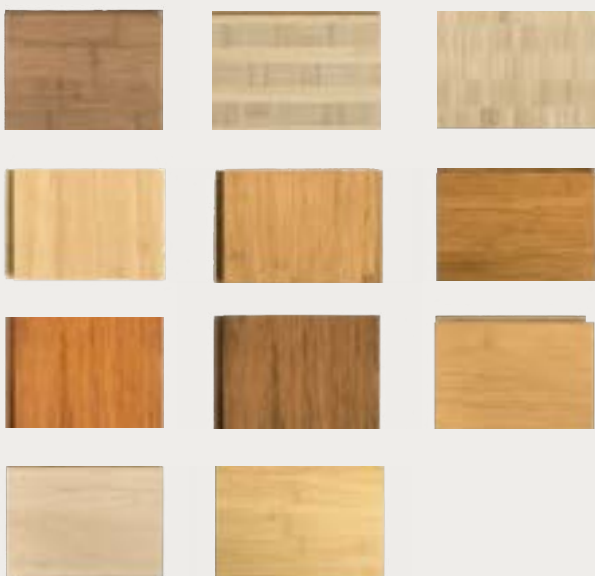

Designed with a unique backing fuse, they provide enhanced stability while maintaining their lightweight charm. The middle blockout feature offers 50% shade, striking a perfect balance between privacy and natural light.

Custom orders are welcome, with a maximum width of 2100mm, ensuring these blinds can be tailored to suit your specific needs. Our Bohemian Sheer Blinds are ideal for indoor settings, where they add a sophisticated, yet relaxed atmosphere to any room.

## FLOORING

Elevate your indoor living space with durable and sustainable Bamboo flooring. Delivering a premium styling option, our Bamboo flooring is longer-wearing than alternative flooring solutions, making it ideal for high-traffic areas in busy family homes.

Suited to any room in your home, including stairs, Bamboo flooring is easy and ready to install over existing surfaces including concrete, tiles and timber, without the need for any toxic glues, nails, sanding or fumes.

Bamboo flooring promises a long life and is naturally resistant to UV fading, fire, termites and chemical staining. Featuring a patented locking system and a 25-year limited residential finish and wear warranty, it is available in six colours and will transform your home with its luxurious look, feel and finish.

## NATURAL | ORGANIC

Celebrating the unique characteristics of nature, our range of organic products effortlessly elevates indoor and outdoor spaces. Including bamboo rods, screens, poles and palm fibre, as well as our very own, Natureed® Organic Water Reed, perfect for fencing, screening and shading solutions. Offering the perfect fusion of simplicity and sophistication these lightweight and versatile solutions deliver a contemporary style that breathes fresh life into your surroundings.

Hand-crafted from superior quality, our very own Natureed® is perfect for fencing, screening and shading solutions. Hand woven with fine-quality stainless steel wires it ensures its durability and elegant look is maintained in harsh environments.

Exclusively available to the House of Bamboo, Natureed® features twice the number of reeds per metre than other alternatives delivering a versatility that means it is also ideal for lightweight shading on its own.

## PANELS & VENEER

Crafted to deliver a luxurious, contemporary look that exudes sustainability and natural authenticity, our engineered Bamboo panels and veneer are an eco-friendly alternative to traditional timber products.

Our engineered laminated bamboo panels come in either a horizontal or vertical pattern and can be matched to any length or thickness to create modern, sophisticated cabinetry and joinery items including cladding, furniture, stairs and benchtops.

Visually appealing and hand-crafted, our Bamboo Woven Veneer is weaved in narrow strips and has two standard styles; Basket Weave and Herringbone. Offering a wide range of sizes it is suited to an array of projects including flooring, cabinetry and joinery and being resistant to moisture makes it an ideal choice for kitchens and bathrooms.

## INDECKRITY® DECKING

Redefining the way you think about outdoor living, our Indeckrity® solution is crafted from natural bamboo, offering a hard-wearing, low-maintenance application.

Specially heat-treated to deliver a durability far exceeding traditional, tropical hardwoods and boasting a Janka hardness rating twice that of Merbau, these bamboo decking boards come pre-oiled with WOODCARE ready for installation. With a 25-year warranty and guaranteed against rot, decay and termites, Indeckrity® is plastic-free, eco-friendly and FDC Certified, ensuring every purchase supports responsible forest management.

Offering the perfect blend of beauty and sustainability our decking is produced without plastics or toxins, meaning they remain cool underfoot on hot summer days.

## BESPOKE JOINERY

Bamboo is different from what it once was. It has transformed. Over the past ten years, the House of Bamboo has worked hard to revolutionise the use of bamboo into a reliable, premium product.

Our team can customise pieces to suit any project requirements, from specific engineered bamboo joinery items, structural beams or even bi-fold doors recently. You can see examples of these items in our showroom. These designs are meticulously crafted and custom-made to precise specifications to meet the needs of each project.

Inspired by our desire to innovate, the House of Bamboo creates cohesive solutions ready for seamless installation. This approach ensures each element integrates effortlessly into the space, embodying functional precision and aesthetic harmony.

## CUSTOM FURNITURE

Bamboo's potential is not only limited to construction materials and interior applications. Engineered bamboo furniture ensures the possibilities are endless. Whether styling a home, fitting out an office, or designing a new outdoor space the House of Bamboo's custom furniture range delivers on aesthetics and sustainability.

Creating custom furniture our team ensures the highest quality design standards with every detail, joint and component carefully considered to ensure the product meets the brief on comfort, form and function.

With our ongoing commitment to eco-friendly production, our custom furniture collection meets our high standards of durability, versatility, sophistication and quality, elevating any space with style and contemporary aesthetics.

## STRUCTURAL BAMBOO

Bamboo is no longer just an aesthetic material; it is emerging as the new frontier in sustainable construction. As a structural material, bamboo offers an innovative alternative to timber, meeting the growing demand for sustainable building solutions. While its strength and durability are comparable to timber, bamboo stands apart as a solution that reduces environmental impact.

Bamboo's rapid growth rate alleviates supply constraints in the face of increasing global timber demand, while its use helps combat deforestation and significantly lowers carbon footprints. These qualities make bamboo not just an option but an ideal choice for the future of construction.

In Australia's evolving construction landscape, the House of Bamboo is here to partner with you. We specialise in designing and manufacturing custom structural bamboo beams and materials tailored to your project objectives. Together, we can achieve environmentally responsible designs that pave the way for a more sustainable future.

## A BAMBOO LEGACY

At House of Bamboo®, we are carrying on a legacy that was founded last century, when Mark Snyders first began to source environmentally conscious bamboo. Recognised globally as a leading bamboo specialist, we are committed to creating beautiful, environmentally friendly bamboo products and encouraging Australians to embrace the benefits of bamboo.

## A SUSTAINABLE FUTURE

In addition to being House of Bamboo® CEO, Jennifer Snyders also pursues her passion for sustainability by advocating bamboo projects throughout Australia and supporting land regeneration and reforestation.

Having qualified at UNSW with a Bachelor of Science (Architecture), she understands the incredible potential of bamboo and her sense of design and technical understanding has allowed her to develop a range of engineered bamboo products that can out perform timber.
